KEY RESPONSIBILITIES:

This position reports directly to the CTO. The ideal candidate is a highly proactive and client focused professional, passionate about the Internet and leading edge technology, experienced in managing large, high traffic web sites in a 24/7 environment.

Must be able to:

- Manage and monitor production servers running over 40 high traffic web services on following platforms:
 - Enterprise class rack mounted servers in a tier 1 data center environment
 - Enterprise class switches, firewalls and routers
 - Windows 2000, 2003, 2008 server OSs
 - Linux server OSs
 - MS SQL Server
 - Internet Information Server, Apache, Tomcat
- Proactively evaluate, extend and improve infrastructure architecture to be able to keep up with high traffic growth.
- Work with software engineers to develop code promotion procedures from development to staging and production environments.
- Implement and maintain backup and recovery strategy for web and database servers.
- Support the office IT environment for end users.
- Collaborate with other operations staff to provide support (including production alert system support on a rotation basis).
- Develop, maintain and document procedures, network and server diagrams.
- Keep current with technology used for Internet publishing by reading recent articles, downloading and evaluating new products and interacting with technology team members and vendors.

Desired Experience and Knowledge:

- 4+ years experience administering high traffic production web sites in a 24/7 environment.
- Expert knowledge of Windows 2003 Server and Internet Information Server.
- Excellent knowledge of Linux OS, Apache web server and related technologies.
- Experience administering production MS SQL Server 2000 or 2005 (DB backup, monitoring, reporting and tuning).
- Expert knowledge of TCP/IP networking and security - routing, filtering, server load balancing, DNS, SMTP, FTP etc.
- Experience in supporting development teams in managing development environments and code promotions.
- Ability to manage multiple initiatives at the same time.
- Well organized with excellent oral and written communication skills.
- Ability to interact with colleagues from technology and business clients.
- Degree or diploma in related field.

Desired Personal Attributes:

- Thrives on being on the technology leading edge .
- Passionate about the Internet.
- Excels in a fast paced, highly interactive web environment.
- Ability to work outside of business hours when on call as part of the pager rotation.
